MVN University, Palwal has always worked tirelessly to fulfill the vision, mission and goal of providing quality education to all regardless of gender, social and economic background. The University which has always set benchmark in education has this time jumped into the bandwagon of creating awareness among students of class XI and XII in deciding their career after plus two.

The career counselling campaign that took many schools by storm was led by a host of distinguished academicians of the University. The teams visited several schools in and around Faridabad, Ballabgharh, Palwal, Hodal, Kosi Kalan, Punhana, Pinangwa, Nuh, Mewat, Hassanpur, etc and interacted with the students to help them in deciding their career after +2.

The visiting teams had an interactive session with the students giving information on the various skill based courses running at MVNU, their eligibility conditions, duration of the course etc. Students and parents showed keen interest in learning about the different courses offered by the University, eligibility criteria and scholarships. The University plans to organise more such career based interactions with schools and young students.
