Project-1

Project Name: ADDRESS BOOK

Student Name: Manoj Kumar Jha

Supervisor: Dr J S Prasad, Mr Manish Kumar (PROJECT MANAGER, CMC Ltd.)

Description of the Address Book App

The Address Book Android App provides convenient access to stored contact information. On the main screen, the user can scroll through an alphabetical contact list and can view a contact’s details by touching the contact’s name. Touching the device’s menu button while viewing a contact’s details displays a menu containing Edit Contact and Delete Contact options. If the user chooses to edit the contact, the app launches a Activity that shows the existing information in EditText. If the user chooses to delete the contact, a dialog asks the user to confirm the delete operation. Touching the device’s menu button while viewing the contact list displays a menu containing an Add Contact option—touching that option launches an Activity for adding a new contact. Touching the Save Contact Button adds the new contact and returns the user to the main contact screen.
